

STAGE MAKEUP APPLICATION TIPS

By Kaleidoscope's Makeup Workshop Artist Kathryn Julian

TIP: Start with a Clean Canvas:
 Cleanse the skin before applying makeup.

1. **Foundation:** When applying a cream foundation, a sponge is the easiest tool to use for an even application. If possible, dampen the sponge with clean lukewarm water. From the center of the face, moving outward in a sweeping or stroking motion, distribute the foundation around the entire face (including eyelids) and onto the neck. Foundation can be touched up later if needed.

2. **Blush:** Lightly dab the blush brush into the pan of blush and tap any excess off. Starting from the center of the cheek, brush up and out toward the ear. Blend lightly in circular motion to evenly distribute the blush.

3. **Eyeshadow:**

- With an eyeshadow brush, apply the lightest shade below the brow bone and the inside corner of the eye nearest the nose.
- Then apply the medium shade between the lash line and the crease of the eyes.
- Starting from the outside corner of the eye to the center part of the crease, apply the darkest shade in a windshield wiper motion. Blend the product into the crease to soften the intensity.

4. **Eye liner:** To create a wing, start at the inside corner of the eye and draw a line along the top lash line to the outside corner. Then starting midway between the outside end of the eyebrow and the outer corner of the eye, draw a wing toward the outer corner. This step takes practice, so be patient!

5. **Mascara:** Keeping eyelids halfway open, gently brush mascara upward from the root to ends of lashes. Repeat to darken all lashes and lower lashes.

6. **Lips:** Apply lipstick from the corner of the mouth going in toward the cupid's bow. If the edges need to be cleaned up, use a makeup wipe and reapply any foundation that is removed.

Removal: Use a mild facial cleanser and warm water. First, remove the eyelashes by lightly pulling and peeling them off the lash line. This does not hurt the eye. Gently cleanse the face and moisturize.
